„Automation tester – qualification and certification in vocational education”

User manual

TestCourse.fun

Introduction

The testcourse.fun platform was created to support students' professional education through the use of digital tools and interactive forms of acquiring knowledge and translating it into a practical dimension.
A course dedicated to students of vocational schools, future programming technicians and IT specialists in the field of software testing.

The testcourse.fun website is an e-learning platform where you can find courses preparing you for the profession of a software tester. Completing the entire course and passing the knowledge test guarantees obtaining a personalized certificate. On the following pages of the presentation, we will discuss the functionalities of the platform, their operation and purpose.

List of Functionalities

▶ Account registration and user login   01

▶ Course selection - general information and site navigation   02

▶ Course and tests - course of the educational path   03

▶ Certificates - generating, searching, downloading   04

▶ User profile   05
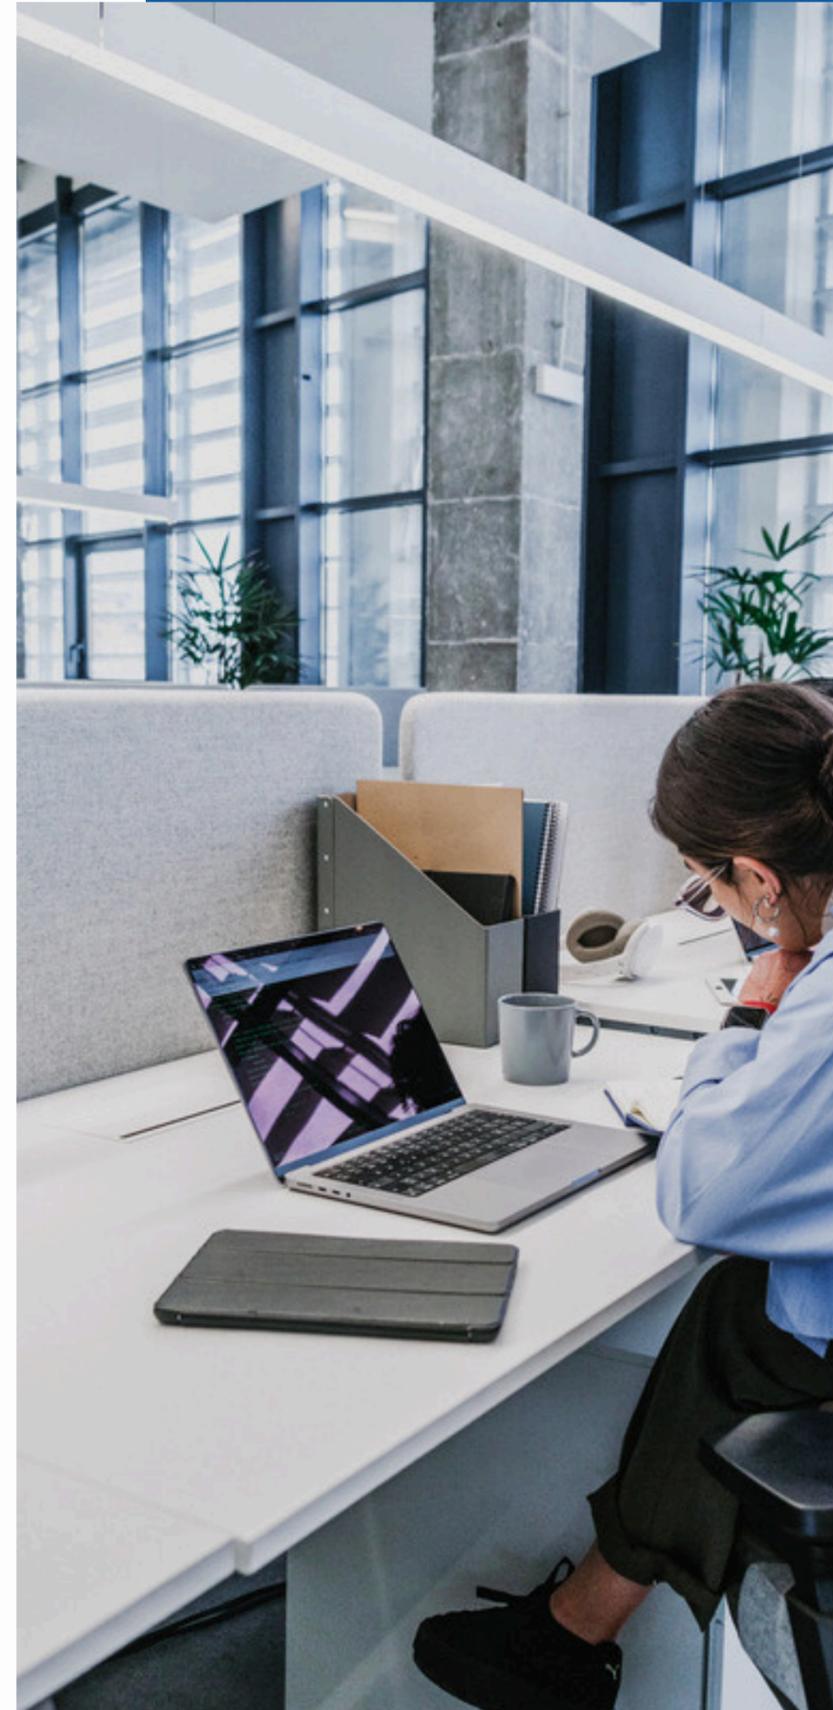

The testcourse.fun platform

is an open resource, any user on the Internet can familiarize themselves with its contents, however, the course content is available only to registered and logged in users.

Creating an account

Scroll down to the bottom of the main page. You will see a login form and a new user registration form. Fill in the data. Keep in mind that the value of the "Username" field will later appear on the Certificate.
Solve simple math problem.
Then click the "Register" button.

Login

You can log in from the login form at the bottom of the home page or click the "Profile" button in the top menu of the page. You will be redirected to a page with the same login form

First login

The first login to the portal is done automatically after registration. When opening the page on another device or in another browser, you must log in again

When you finish using our portal and close the tab, the user session will end. As a result, you will have to log in to the portal again. So remember the email you used to register and the password you used. You can save them in your memory but also in the browser's memory.

Re-login

You can log in from the login form at the bottom of the home page or click the "Profile" button in the top menu of the page. You will be redirected to a page with the same login form.

After logging in, you will be redirected to the Profile page. This is where the user panel is located.

Password reset

Anyone can forget a password. We are prepared for such a scenario.

In the login form, select "Forgot your password?". Then enter your username or email address and click the "get password" button. Check your email. You will receive an email with a link to create a new password.

Czy kiedykolwiek zastanawiałeś się, jak zapewnić, że oprogramowanie działa zgodnie z oczekiwaniami? Jeśli tak, to ten kurs jest dla Ciebie! Kurs Podstaw Testowania Oprogramowania jest idealnym wprowadzeniem do fascynującego świata testowania oprogramowania.

Niezależnie od tego, czy dopiero zaczynasz swoją przygodę w branży technologicznej, czy też już jesteś doświadczonym programistą, ten kurs dostarczy Ci kluczowych umiejętności i wiedzy potrzebnej do efektywnego testowania oprogramowania.

Podczas tego kursu dowiesz się:

- Podstawowych koncepcji związanych z testowaniem oprogramowania.
- Różnych rodzajów testów i ich zastosowań.
- Metodologii testowania, w tym podejścia zwinne.
- Narzędzi i technik używanych przez testerów oprogramowania.
- Jak tworzyć skuteczne przypadki testowe i raportować znalezione błędy.

Zajęcia będą prowadzone w formie interaktywnych wykładów, dyskusji oraz praktycznych ćwiczeń, które pozwolą Ci solidnie zakotwiczyć zdobytą wiedzę. Niezależnie od Twoich celów zawodowych, umiejętności w zakresie testowania oprogramowania są niezwykle wartościowe, otwierając przed Tobą wiele możliwości kariery w dynamicznym świecie IT.

★★★★★

Kurs Podstaw Testowania Oprogramowania był dla mnie fantastycznym doświadczeniem! Bardzo podobał mi się sposób, w jaki materiał był przedstawiany - zrozumiały, przystępny i pełen praktycznych przykładów. Nauczyciele byli nie tylko kompetentni, ale również bardzo pomocni i chętni do udzielenia odpowiedzi na wszelkie pytania. Dzięki temu kursowi zyskałem solidne podstawy w testowaniu oprogramowania i teraz czuję się pewniej w swojej pracy. Gorąco polecam ten kurs każdemu, kto chce rozwijać się w branży IT!

In the panel on the left side there is a list of lessons

By clicking on the name, you can go to the next lesson
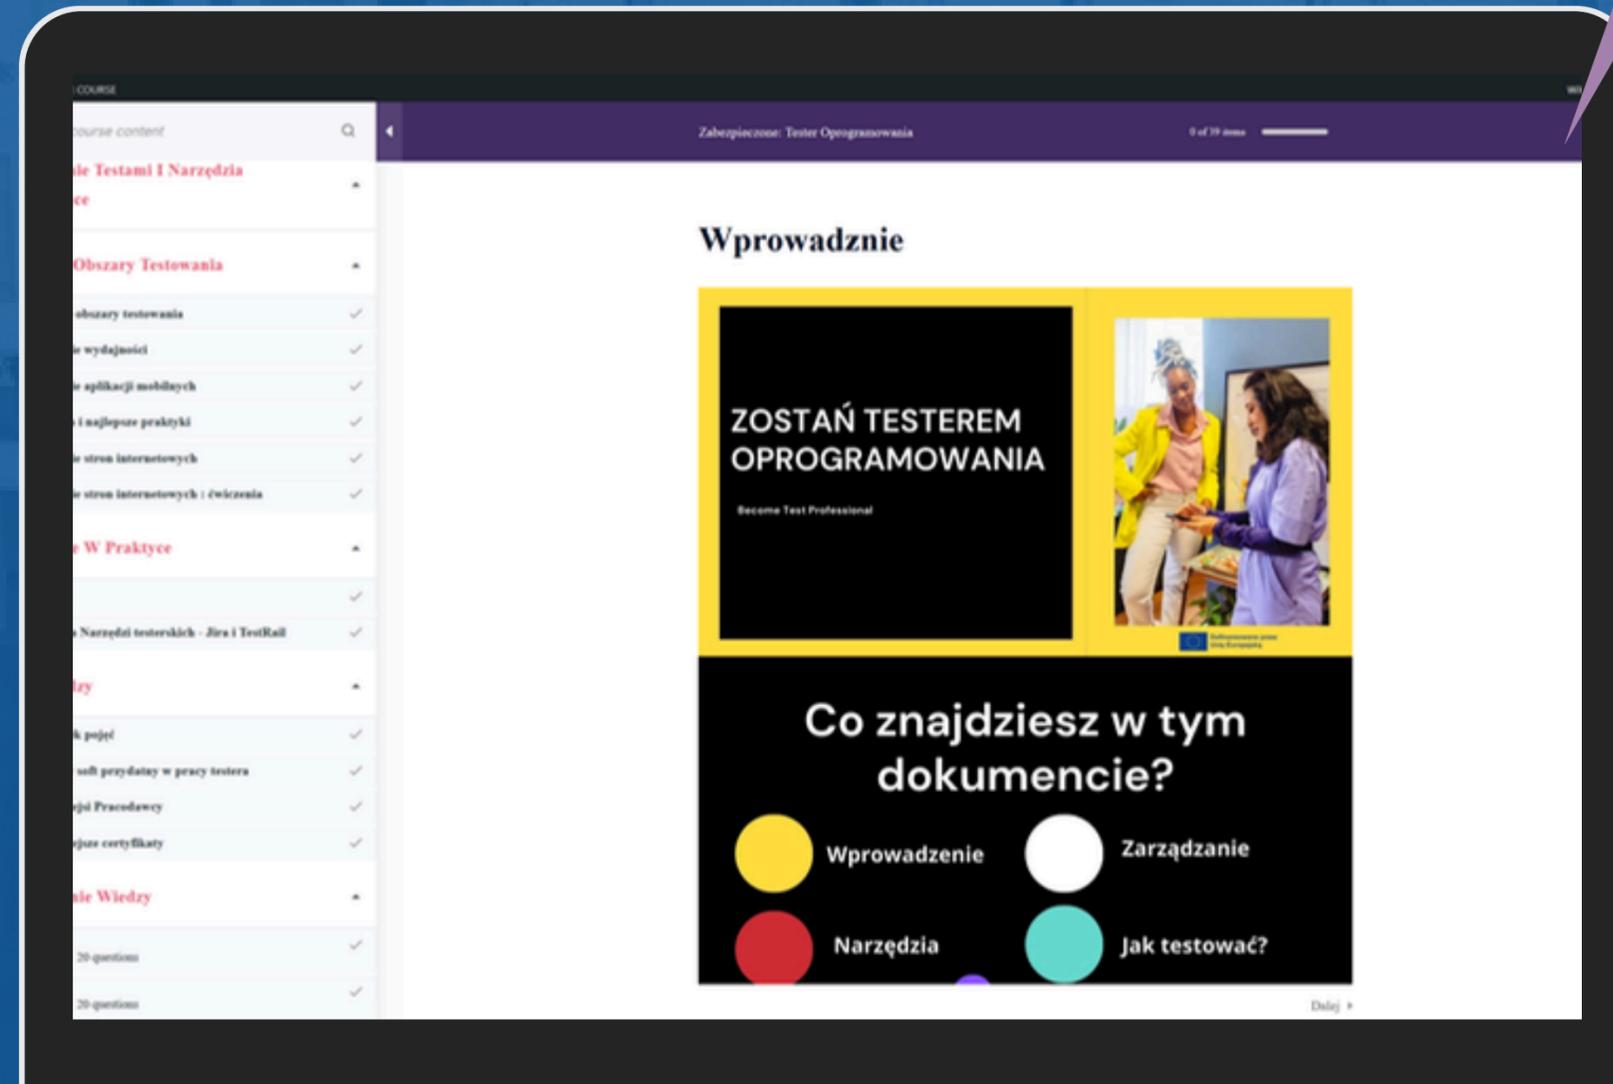

The main part of the screen is occupied by the lesson content

After reading the lesson content

Click the "Finish" button

Confirm completion of this lesson. You will automatically move on to the next lesson. You can see that the first lesson is now marked in green as passed. You will be able to check the progress of your course in the user panel.

To exit the course view, tap the X icon in the upper right corner of the screen.

Knowledge check

At the end of the course there is a module to test the knowledge acquired. **To begin, click the "Get Started" button.**

From this moment the test time will start counting. The test will end after the allotted time has elapsed or after clicking

"COMPLETE TEST" button and confirming your selection.
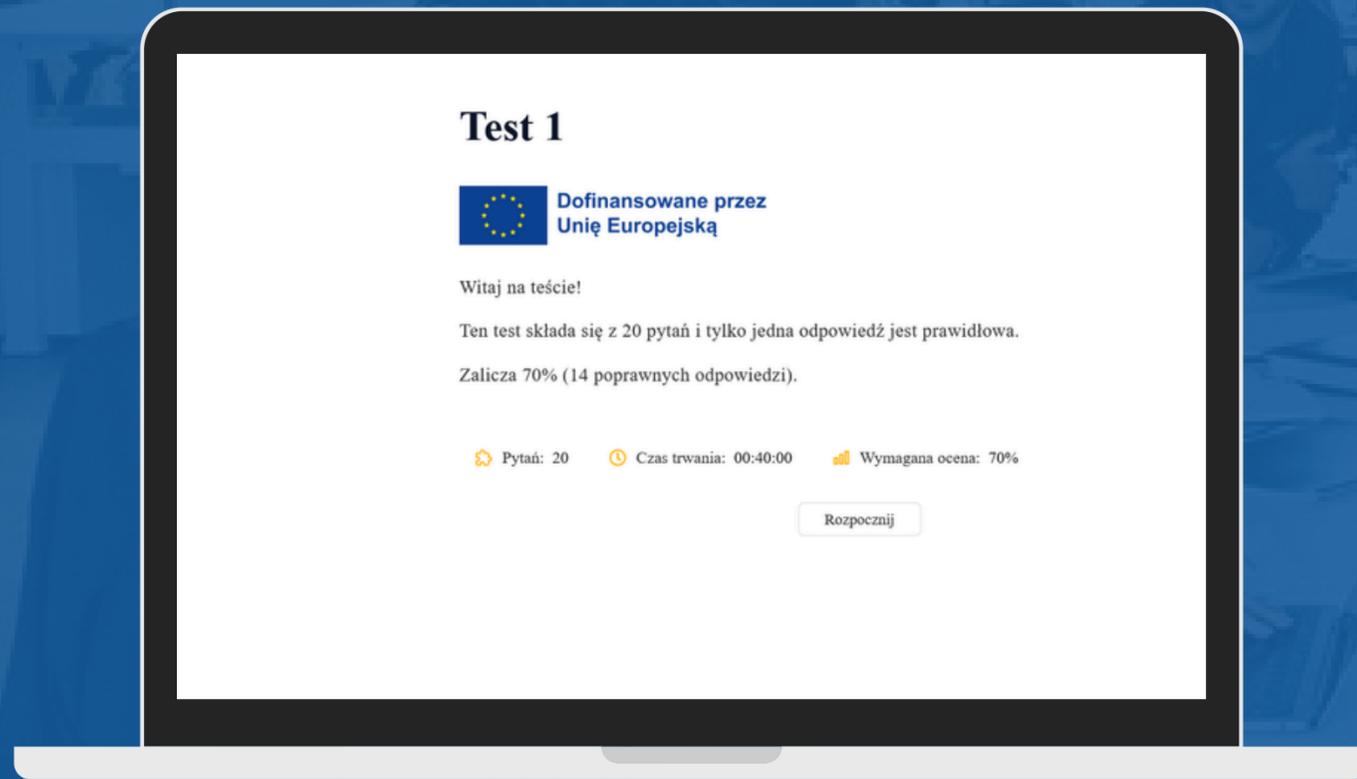

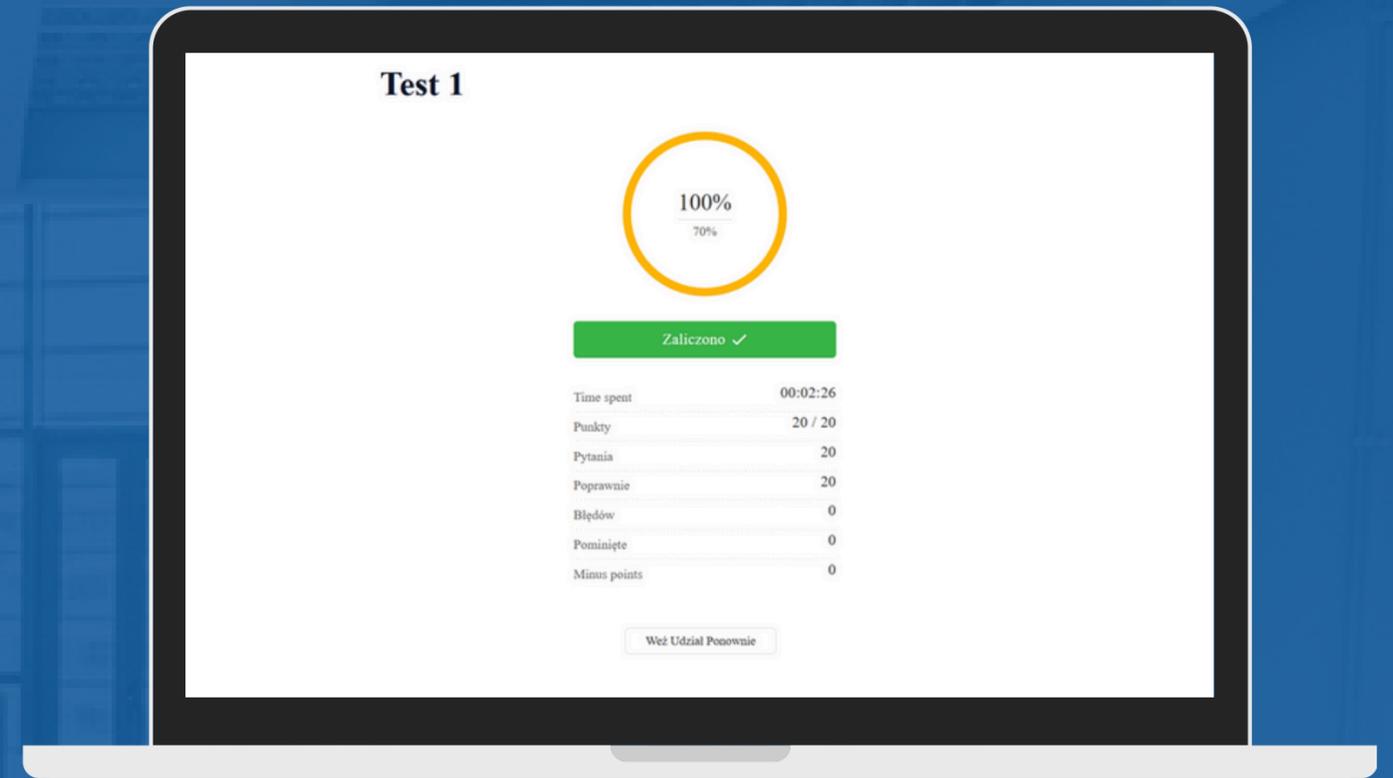

Once completed, you will see a summary of the most important test statistics.

The final assessment of the knowledge acquired is the average result of all solved tests.

After successfully completing the knowledge verification module. You will complete the course and receive:

Certificate confirming the knowledge acquired.

End of Course and Certificate

After successfully completing the last test. The results of all tests will be recalculated, if you have reached the pass threshold, a

"End Course" button

After selecting it, a window with the granted certificate will pop up

Scroll down to the bottom of the window and press the button below it to save the Certificate to your computer's disk.

You will also have access to the Certificate later in the user panel. You can get there by clicking in the top menu of the page in

"Profile" button

As well as after entering the course subpage

Profile - user panel
